Summary

Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, and hands-on experience building full-stack web applications using React, Node.js, and Firebase. Skilled in Machine Learning fundamentals and data analysis using Python libraries such as NumPy, Pandas, and Scikit-learn. Passionate about AI/ML, cybersecurity, and scalable system design, with a proven ability to deliver clean, efficient, and production-ready software.

Education

Indian Institute of Information Technology Guwahati **2024 – Present**
Bachelor of Technology in Computer Science – CPI: 8.11 *Guwahati, India*

Rajasthan Board of Secondary Education **2022 – 2024**
Senior Secondary Examination (Class 12) – Percentage: 89.0% *Sikar, Rajasthan, India*
Secondary Examination (Class 10) – Percentage: 90.67% *Nasirda, Rajasthan, India*

Technical Skills

Languages: C, C++, Java, Python, JavaScript
Web Development: React, HTML5, CSS, TailwindCSS, Node.js, Firebase, REST APIs, Framer Motion
Machine Learning & Data: NumPy, Pandas, Scikit-learn, Data Analysis, Matplotlib
Tools & Platforms: Git, GitHub, VS Code, Figma
Core Concepts: Data Structures & Algorithms, OOPs, Operating Systems, DBMS, Responsive Design, Version Control

Projects

School Web | School Information & Management Website
- Developed and deployed a full-stack responsive website for my former school, currently used by them with **300+ active students** and supporting parent sign-up and onboarding.
- Designed a clean, mobile-responsive UI presenting academics, facilities, and announcements, and integrated Firebase for authentication and real-time data storage.
- **Tech Stack:** React, Node.js, Firebase, Authentication, Responsive Design, Full-Stack Development

TechSprint | AI-Assisted Healthcare Platform
- Built a full-stack AI-assisted healthcare platform enabling patients to book doctor appointments and receive preliminary AI-driven medical guidance.
- Implemented emergency service modules – ambulance request, blood availability tracking, and first-aid guidance – to improve response time in critical situations.
- **Tech Stack:** React, Firebase, JavaScript, REST APIs, AI Integration, Real-Time Systems

5-bit XOR Cipher | Symmetric Encryption Tool
- Implemented a lightweight encryption/decryption tool demonstrating core symmetric cryptography and bitwise-operation concepts.
- Applied bitwise XOR logic to efficiently encode and decode messages, reinforcing low-level data security principles.
- **Tech Stack:** C++, STL, Cryptography, Bitwise Operations, Algorithm Design

Inventory Manager | CLI-Based Inventory Management System
- Developed a command-line inventory management system to track and manage stock records for small businesses.
- Implemented full CRUD operations using C structures and persistent file handling for reliable data storage.
- **Tech Stack:** C, File Handling, Data Structures, CRUD Operations, System Design

Portfolio Website | Personal Developer Portfolio
- Built a modern, animated developer portfolio to showcase projects, skills, and technical experience.
- **Tech Stack:** React, Node.js, Framer Motion, SMTP, Responsive Design

Experience

Technical Team Member

Entropy25
- Contributed to the development and design of the official event website, collaborating with a cross-functional team.

Achievements

- Smart India Hackathon (SIH) 2025 – Top-7 nationwide (Team Leader)
- LeetCode – Max Contest Rating: **1726**
- JEE Advanced 2024 – Qualified
- JEE Main – 98.27 Percentile
